Sensing element model XM 3D 05

**3D sensitivity, sensing element can be located anywhere and oriented in any manner on ceiling, wall, floor; vertical, slope or curved plane.**

- Based on absorption technology and modern polymers.
- Excellent sensitivity for TAP, DEIONIZED, MIST SPRAYED WATER, STEAM, CONDENSATE.
- Minimum detectable volume of leak is 5 ml of water.
- Compatible with conventional technologies for remote leak detection, locating and measurement the size of the leak.

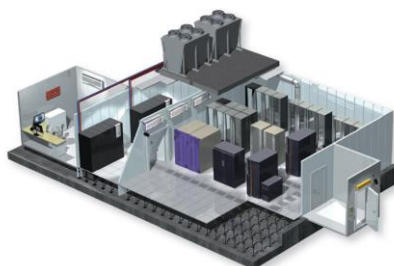

## TYPICAL APPLICATIONS

### APARTMENTS

### DATA CENTERS

### TUNNELS
