

Locking system for cargo compartments of vehicles

- > Keyless system, no access to lock from the outside of a vehicle.
- > Controlled by GPS/GSM device or Bluetooth controller.
- > Easy integration into vehicle telematics or GPS tracking system.
- > ***IceBreaker feature** for refrigerator truck and trailer.
- > ****Automatic Locking** when use dedicated Bluetooth controller.

* If the lock is unable to move the bolt because it is stuck due to freezing, it makes 10 attempts, increasing the force of the movement in each attempt, up to a maximum of 300 N.

** The doors locked automatically once they closed.

Power supply, V DC. 12-24
Bolt diameter, mm. 18

Max. current, A 10
Bolt displacement, mm. 50
