

DETECTOR OF JAMMER THE GPS/GLONASS SIGNAL

Detector of Jamming the GPS/GLONASS signal can be connected to the virtually any GPS/GSM/SAT telematics device and easy integrated into the vehicle tracking software. As soon as it detects Jamming the GPS signal, it sends a signal about the beginning of jamming, helping to determine the last available coordinates. It can be used with almost any security or alarm system which use the GPS/GLONASS technology and bears available digital inputs.
