

Smart Speed Limit Device NK-80 Provider of Active Safety features

This Smart Speed Limit device model NK-80 provides the Active Safety features and may be used together with the Vehicle Telematics and Driver Monitoring systems.

It will Limit the Speed due to many factors & conditions and maintains the driver, passenger, cargo, vehicle road and infrastructure safety.

The speed can be limit automatically due to:

- The driver is over-speeding
- Vehicle entered the No-Go zone
- The fatigue sensor was triggered
- The safety belt is not fastened
 - The tire pressure is low
 - The door is not closed
- The engine temperature is high
 - The oil pressure is low
- Any data obtained from sensors, GSM/GPS device or CAN BUS

The device does NOT SHUT THE ENGINE OFF and the proper functioning of brakes and steering is NOT AFFECTED.
